Udupi, Karnataka, India

EDUCATION

Mangalore Institute of Technology and Engineering <i>B.E. in Computer Science and Engineering (CGPA: 8.28 upto 7th Semester)</i>	Moodbidri, Karnataka 2022 – Present
Vidyodaya PU College <i>Pre-University Course PCMB (Score: 84.8%)</i>	Udupi, Karnataka 2021 – 2022
Silas International School <i>Secondary School SSLC (Score: 89.4%)</i>	Udupi, Karnataka 2019 – 2020

INTERNSHIP

ML RESEARCH INTERN <i>Manipal Institute of Technology</i>	January 2026 – Present
---	------------------------

- Developed a **machine learning-based fault prognosis model** using **Deep Neural Networks (DNN)** integrated with **SINDy** for dynamic system identification and prediction
- Trained and optimized DNN models to map process states to model coefficients, enabling **real-time adaptive learning under changing conditions**
- Built and evaluated predictive models for **time-to-failure forecasting** in a simulated batch reactor, improving prediction accuracy
- Implemented end-to-end ML pipelines in **Python (NumPy, SciPy, Matplotlib)** for data generation, feature modeling, training, and validation

PROJECTS

Multi-Modal Stroke Risk Prediction Platform | *Python, Flask, TensorFlow, PyTorch, XGBoost, MONAI*

- Developed a **multi-modal AI system** for stroke risk prediction using **EHR, genetic, and MRI data**
- Integrated **DNN, XGBoost, and SegResNet** into a Flask backend for unified risk analysis
- Built a **medical imaging pipeline** supporting **DICOM/NIfTI formats** for MRI processing and lesion detection
- Designed a **hybrid risk scoring system with feature engineering and explainability**, identifying key clinical risk factors

Student Feedback Analysis Dashboard | *Python, Pandas, Scikit-learn, Streamlit, Plotly, TextBlob*

- Developed an **end-to-end data analytics and machine learning pipeline** to process 1000+ student feedback records, including cleaning, feature engineering, and EDA
- Applied **ANOVA and unsupervised learning (K-Means, PCA)** to identify student segments and key factors influencing satisfaction
- Built an **interactive Streamlit dashboard** with Plotly visualizations for KPIs, correlations, clustering, and real-time filtering

TECHNICAL SKILLS

Languages: Python, SQL, Java

Databases: PostgreSQL

Tools & Technologies: Git, VS Code, Flask, MONAI, Jupyter Notebook, Google Colab, Kaggle

Libraries/Frameworks: TensorFlow, PyTorch, Scikit-learn, Numpy, Pandas, Matplotlib

COURSES & WORKSHOPS

- The Complete SQL Bootcamp: Go from Zero to Hero
- The Data Science Course: Complete Data Science Bootcamp 2025
- Mastering Python for Product & Process Development : Beginning to Practitioner
- Building AI/ML Foundation with Python
- Building with Claude API
