Udupi, Karnataka, India

EDUCATION

Mangalore Institute of Technology and Engineering
B.E. in Computer Science and Engineering (CGPA: 8.49)

Moodbidri, Karnataka
2022 – 2026

Vidyodaya PU College
Pre-University Course PCMB (Score: 84.8%)

Udupi, Karnataka
2021 – 2022

Silas International School
Secondary School SSLC (Score: 89.4%)

Udupi, Karnataka
2019 – 2020

PROJECTS

Autonomous Multi-Agent Data Science & BI System | *Python, CrewAI, Docker, Gradio, Plotly, Pandas, Context7 MCP*

- Architected an **autonomous multi-agent BI system** using **CrewAI** orchestrating 4 specialized AI agents (Data Strategist, Data Engineer, Dashboard Engineer, QA Reporter) for end-to-end data analytics and reporting
- Engineered **automated ETL data pipelines** with **Docker sandbox isolation** for safe execution, integrating **Context7 MCP** for dynamic API resolution and schema inspection
- Developed an **interactive dark-themed Gradio 6 web dashboard** featuring real-time KPI metric cards, multi-dimensional Plotly visualizations, and non-blocking automated callback validation
- Automated **executive QA business reporting** and statistical aggregations, auditing data consistency across transactional e-commerce records

Multi-Modal Stroke Risk Prediction Platform | *Python, Flask, TensorFlow, PyTorch, XGBoost, MONAI*

- Developed a **multi-modal AI system** for stroke risk prediction using **EHR, genetic, and MRI data**
- Integrated **DNN, XGBoost, and SegResNet** into a Flask backend for unified risk analysis
- Built a **medical imaging pipeline** supporting **DICOM/NIfTI formats** for MRI processing and lesion detection
- Designed a **hybrid risk scoring system with feature engineering and explainability**, identifying key clinical risk factors

Student Feedback Analysis Dashboard | *Python, Pandas, Scikit-learn, Streamlit, Plotly, TextBlob*

- Developed an **end-to-end data analytics and machine learning pipeline** to process 1000+ student feedback records, including cleaning, feature engineering, and EDA
- Applied **ANOVA and unsupervised learning (K-Means, PCA)** to identify student segments and key factors influencing satisfaction
- Built an **interactive Streamlit dashboard** with Plotly visualizations for KPIs, correlations, clustering, and real-time filtering

TECHNICAL SKILLS

Programming: Python, SQL, Java

AI & Agentic Development: LangChain, LangGraph, CrewAI, OpenAI SDK, Model Context Protocol (MCP)

LLMs & Generative AI: RAG (Retrieval-Augmented Generation), Hugging Face, Fine-Tuning (QLoRA, PEFT), ChromaDB, LiteLLM, Ollama

Machine Learning & Deep Learning: PyTorch, TensorFlow, Scikit-learn, XGBoost, MONAI, Pandas, NumPy, SciPy

Backend, Deployment & MLOps: FastAPI, Flask, Docker, Modal, Weights & Biases (W&B)

Databases & Visualization: PostgreSQL, SQLite, Matplotlib, Plotly

Developer Tools: Git, VS Code, Jupyter, Google Colab, Kaggle, Gradio, Streamlit

COURSES & WORKSHOPS

- The Complete SQL Bootcamp: Go from Zero to Hero
- The Data Science Course: Complete Data Science Bootcamp 2025
- Mastering Python for Product & Process Development : Beginning to Practitioner
- Building AI/ML Foundation with Python
- AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents
- AI Engineer Agentic Track: The Complete Agent & MCP Course
